

SERIES TOWER CLIMBING HARNESS

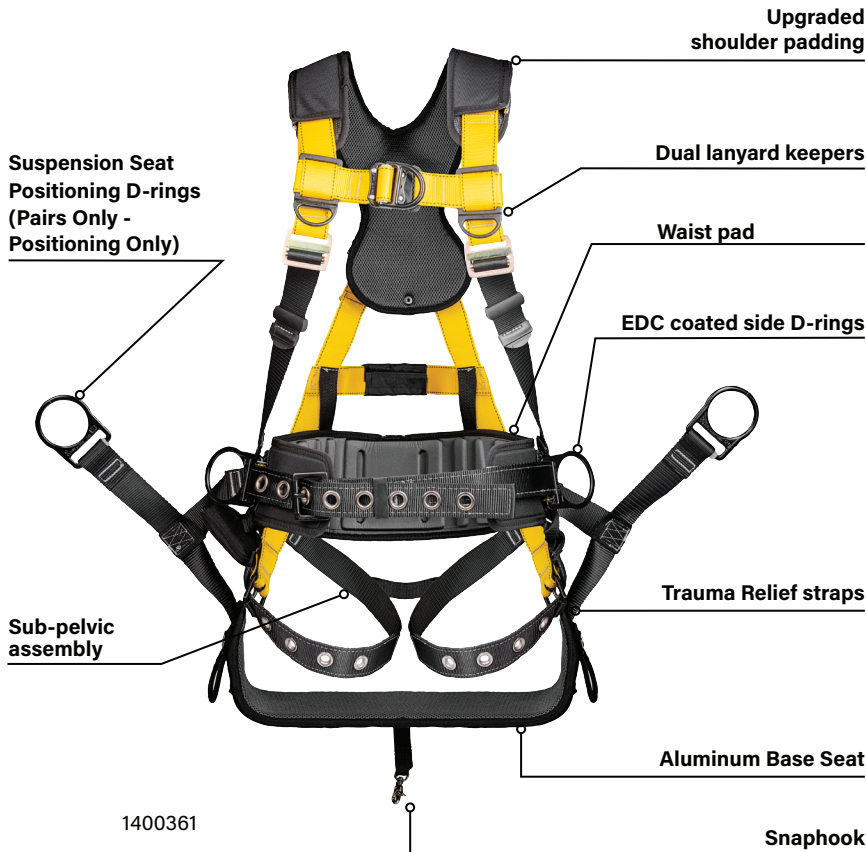

The Series Tower-Climbing Harness – an ideal solution for those looking for all-day comfort and usability on the job. When working at extreme heights, ease of use and comfort from your fall protection gear is critical. The Series harness was expertly crafted and designed by Guardian through years of user input and insight. The Series Tower Climbing Harness builds upon the established Series line and adds an aluminum-based seat sling for added comfort and support while working hours on end at height, helping reduce user fatigue.

SERIES TOWER CLIMBING HARNESS

Key features & benefits

Series 1 & 3 features

The Series 5 comes loaded with all of the Series 1 & 3 features

Upgraded shoulder padding

Leather lined padding further reduces chaffing and protects the webbing on the shoulders and around the D-ring

Integral trauma relief straps

Prevents suspension trauma in case of a fall

Upgraded leg padding (removable)

Alleviates tension on your legs and adds greater comfort

Retractable label cover

Secures inspection tags and labels in heavy-duty rubber to keep them hidden from the elements

Customizable options

Multiple webbing colors are available
Add your company logo to label cover

Aluminum base seat

Lightweight and sturdy for all day comfort and support

Snaphook for seat storage

When not using the seat, keeps it packed high to avoid nuisance contact with your legs, cables, or other workers

Suspension Seat D-Rings

Ideal Positioning D-Rings for suspension and extended periods of work positioning. To be used in pairs only. Work positioning only.

Supportive anti-sag straps

Provides support to the waist pad to prevent sagging when bags, pouches and tools are added
